### Local Items.

#### Postponed.

The meeting of tobacco growers,  
called for next Saturday, has been  
postponed, and no meeting will be  
held at that time.

The Gleaners will meet at the Grad-  
ed School building at 2:30 Saturday,  
and we are requested to say that the  
meeting will adjourn promptly at four  
o'clock.

#### The Best of Literature.

I am prepared to order any magazine  
or other publication, on the very short-  
est notice, and can save you both time  
and money on same. Call at store of  
Joseph Mercantile Co. Will appreci-  
ate your orders. Mrs Dolly Brown.

#### Court Day.

A very large crowd was in town Mon-  
day, and business with the merchants  
was reasonably good. There was quite  
a lot of stock on the market, but few  
sales were made. A great many mules  
were on the streets, some of which  
were sold at fair prices.

#### Much Sickness.

There never has been so much sick-  
ness in the community as at present.  
The trouble is from colds and a gripe.  
We are told that some parties have  
even sent to neighboring towns for  
physicians, because "there is so much  
sickness among the Lancaster doc-  
tors (?)".

#### Married in Mississippi.

W H Ward received a telegram  
Wednesday saying Grover Ward had  
married Miss Sue Barrier, daughter of  
Dr Barrier, of Rolling Fork, Miss.  
Mr Ward is well known in Lancaster  
and has many friends who extend  
congratulations.

#### Two Sudden Deaths.

A colozen woman, named Alice Leav-  
ell, dropped dead in Joseph's store  
Monday morning. She was in apparent  
good health, but gased once or  
twice and fell to the floor, expiring  
within three or four minutes. Anoth-  
er colored woman, the wife of Harry  
Kaufman, died suddenly Tuesday  
morning from the effects of tonsilitis.

### Farm and Stock.

Lime is frequently needed to insure  
success in an oats crop as well as in  
other grain crops. There are thou-  
sands of acres of fertile land that are  
sour and fail to make good crops,  
when by thorough preparation and a  
few hundred pounds of lime a great  
change would be seen. In many in-  
stances where the yield of oats was  
not satisfactory and the lime was pro-  
perly administered, the result has  
been highly profitable.

Paris Kentuckian says that contrary  
to the usual scale of prices in Bourbon  
county clover hay is bringing more  
remunerative prices than the timothy  
article. On the Paris market the  
former is selling in the baled form at  
about \$14 per ton, while the later is  
commanding \$11. Timothy hay, in  
the rick and stack, where it is not  
damaged by weather, is selling in the  
field at \$8.50 to \$9 per ton.

The "Dog Committee" of the legisla-  
ture has agreed on a bill, the gist of  
which is: "That each head of a family  
shall be allowed to possess one dog  
upon which no tax shall be collectable.  
Each additional dog, however, shall be  
liable for a poll tax of fifty cents.  
The money accruing from this dog tax  
shall be turned into the county treas-  
ury, instead of to the State Auditor,  
as at present. After the cost of dam-  
ages to sheep has been paid out of it,  
the excess shall be divided to the  
schools or good roads, whichever the  
fiscal court may believe needs it most.

Capt William Hicks, who resides on  
Barren river, in Barren county, tells of  
a remarkable profit on a lot of orchard  
grass sowed by himself. Last  
year he sowed forty acres in orchard  
grass. On this land he pastured his  
sheep and lambs up to May 10. He  
then took them off and from same  
land cut a ton to the acre, for which  
he received \$20 a ton. He also threshed  
10 bu per acre of orchard grass seed  
for \$1.50 per bushel. Outside the pas-  
ture for his sheep, Capt Hicks realized  
\$1,400 off his 40 acres grass. His stand  
of orchard grass this season will be  
better than last year. -Litchfield Gazette.

J J Peed sold his farm of 250 acres  
two miles south of Millersburg, on the  
Maysville turnpike, Wednesday after  
noon, to Mr Henry Letton, near Car-  
lisle, for \$115 per acre. This is one of  
the best farms in Bourbon, was pur-  
chased by Mr Peed in 1889 from the  
estate of the late Jesse Boulden at \$85  
per acre. -Paris Kentuckian.

We are asked to publish "the condi-  
tions and cost of having a horse regis-  
tered." In reply will say that it de-  
pends on what breed of horses you refer  
to. There are a dozen or more horse  
registers in the United States,  
each having their own rules and regula-  
tions. For instance, saddle horses,  
trotting horses, Morgan horses, Ger-  
man Coach and a number of other  
breeds of heavy horses. The secretaries  
of any of these associations will give  
you the desired information if you will  
write them. Col I B Nall, Columbia  
Building, Louisville, Ky., is Secretary  
of the American Saddle Horse Associa-  
tion.

## What Is the First Law of Nature?

"Self preservation is the first law of nature," answers  
Johnny Jones.

Correct, Johnny. Go right up to the head of the class.  
This law applies to a community as well as to an indi-  
vidual. Under the severe operation of this law a town that  
does not take care of itself, that does not look after its own  
interests first, that does not look out for Number One, soon  
falls into a bad way.

That's just as sure as shootin'. It's the law.

We must obey the law or take the consequences. If

we in this town and com-  
munity do not work to-  
gether for our own good,  
the mutual good of all of  
us, in all lines of busi-  
ness, we have only our-  
selves to blame if the  
place slides down the in-  
clined plane instead of  
climbing the golden lad-  
der of prosperity and  
progress.

For instance, if we  
do our retail trading with  
big city stores that have  
no interest in us ex-  
cept to get our money  
and keep it, local trade  
must suffer and shrink,  
town property values and  
farm land values must de-  
crease — and there you  
are!

Johnny Jones, who  
knows the law, is a wise  
lad, but how about his  
papa and mamma?

Do they obey the first  
law as applied to the old home place? If they don't, Johnny  
may have to apply the law to himself when he grows up. He  
may have to go to the city to make a living.

Let's all think it over.

Ladies' Spring Oxfords,

Men's Oxfords and Shoes.

We cordially invite  
you to call and in-

### Tobacco Growers, Attention!

Having been asked several times the question, "Will you insure tobacco for me this year?" I want to ask that so long as the condition remains as it is now in Garrard county, I will, but only for those who place their entire property in the company they ask to carry the hazardous part of their risk, for it is hardly fair to ask one Company to take the worst part of the risk or that which some other agent can handle. Assuring all my patrons who want to have their tobacco insured, I am willing to protect them. J. H. Kinnard, Agent

With straining eyes the pale-faced man watched the advancing policemen through the window. No sooner had the bluecoats reached the porch when, with trembling fingers, he drew a heavy revolver from his pocket and pressed the muzzle against his throbbing temple. Before his nervous fingers could pull the deadly trigger his faithful wife dashed the weapon aside.

"John, John!" she gasped, don't! They've only come to summons you for a jury."

"If that's the case I'll submit peacefully," answered the man, wiping the cold sweat from his brow. "But I'll die before I'll shovel the snow off that walk!"—Judge.

Weaver—Why, he just won ten dollars on a bet.

Weaver—Won ten dollars, did he?

There's always some brainless sucker ready to part with his hard-earned cash betting on a proposition which any child with brains enough to blow a whistle would know was certain to be beat. What consummate ass did Sweetson make that ten dollars off?

Weaver—Why, he—er—won it off me.—Judge.

Agreed with Him.

Parishioner (a little the worse for liquor) I hear you preach last night.

New Minister—You didn't hear much, I fancy.

Parishioner—Thaz what (hic) I thought myself.—Judge.

Unfortunate.

I met a legless man one day, a poor unfortunate, who begs From everyone who goes his way—

A legless legless, I mean I said.

"Your right my soul with pity fills: Your legs are gone!" I bowed my head—

"However do you foot your bills?"—Detroit Free Press.

THOSE GIRLS AGAIN.

Jack—Do you girls really trust each other?

Dollie—Of course we do. Ethel just told me she was in love with you. She confided in me because she knew I wouldn't tell!

Advice.

This generous world in which we live With good advice keeps men awake. 'Tis something that all love to give And no one really cares to take.

Fate's Perversity.  
Did you see where a girl was stricken blind in New York while playing the piano?"

"That just shows how perverse fate is even with its afflictions. Why didn't it strike with deafness the people who have to listen to girls playing the piano?"—Baltimore American.

In and Out.

"I tell you," bellowed the street corner orator, "there are two sides to this question of reforming people by imprisoning them!"

"You bet!" muttered Tufold Knut, who was leaning against a lamp post. "I've tried both sides of it lots of times."—Chicago Tribune.

DEATH IN THEIR OCCUPATION.  
Makers of Mirrors Poisoned by the Vapor of Mercury.

Every mirror is made at the cost of human suffering and poisoning. The silverying of the glass by applying a layer of tin foil alloyed with mercury involves so much risk of poisoning, the work people constantly breathing the mercury vapor, that numerous attempts have been made to use another metal for the purpose.

It was shown by Liebig that a fine adherent deposit of metallic silver could be applied to glass by reducing a solution of a silver salt with milk sugar, so this method has been employed as a commercial process. There have been partly successful attempts to get a like deposit of copper.

The mirror often lacks brilliancy and is usually disfigured with stains. But it has been found by one F. D. Chatwatt of England that solutions of copper salts can produce brilliant reddish films of metallic copper which are as perfect reflectors as silver mirrors. His method of coating glass with a layer of copper, it is thought, will probably be used extensively in making mirrors and other glassware articles.

A galvanized iron tank is placed in an upper room just beneath the eaves of roof. The arrangement of the various pipes, etc., can best be understood by reference to diagram given herewith. T is the tank; E, pipe from one side of tank into N, leader from roof to cistern; C, cistern; I, pipe from cistern to tank, by which tank may be filled when rains are not frequent enough to do it; P, pump at kitchen sink; R, range; H, hot-water tank; J, pipe from large tank supplying cold water for bathroom and for hot-water tank; B, bathtub; A, closet; L, cold-water faucet; M, hot-water faucet; V, waste pipe from bathroom; D, soil pipe leading to cesspool away from house.

The cut is made in this way merely to show the different parts. The various fixtures should, of course, be located according to the construction of the house, arranging things so as to have as little pipe with as few turns as is practicable.

The pump is used for the water supply in the kitchen. Being a double-acting pump, one can, by changing the shut-offs, pump water from the cistern to fill the upper tank.

The filter, F, is not entirely necessary.

By having an aerator attachment to the pump, and by taking the precaution to turn out the first water that falls after a dry spell, the cistern will be quite satisfactory. It should be cleaned out two or three times a year.

Not counting the cistern (which is usually already present) the materials, says the Farm Journal, would cost something as follows (labor not included):

Galvanized iron tank, \$5; bathtub, \$5; hot-water tank, \$5; pump, \$6.50; one and one-half inch galvanized iron pipe and three-inch cast-iron pipe to cesspool, about \$30; traps, vents, etc., perhaps \$10.

The soil pipe to the cesspool should

have a good fall so as always to run clear of obstructions; it should be trapped and vented in the best manner. The fixtures in the house should also be trapped and vented—a plumber will explain all such details not shown on diagram. Without traps and vents sewer gas is likely to get into the house and poison the inmates. Cheap, poorly connected plumbing is worse than none—it is continually getting out of order and menacing health. Get a first-class job.
